

## FOR SAN DIEGO

### Service Project Safety Protocols

Thank you for your willingness to serve with Hope for San Diego. The first way we can serve our community on Day of Service is to ensure that we are not in any way contributing to the spread of COVID-19 to our most vulnerable neighbors. Please observe these restrictions and protocols in order to protect yourself, other volunteers, our affiliate staff and clients, as well as the larger San Diego community.

#### PARTICIPATION RESTRICTIONS

If you have experienced COVID-19 symptoms or have tested positive, or if a member of your household has experienced COVID-19 symptoms or tested positive, please do not volunteer until you or your household member has been symptom-free AND fever-free without taking any medication for at least 14 days.

If you are not feeling well, or if you have symptoms such as coughing, sneezing, runny nose or fever, or even if you think it is not COVID-19, you will not be able to volunteer.

If you answer NO to all of the questions below, you will be able to participate:

- Have you traveled outside the United States in the past 14 days?
- Have you had contact with anyone with confirmed COVID-19 in the last 14 days?
- Have you had any cold symptoms including fever greater than 100, dry cough or difficulty breathing in the past 14 days?
- Are you currently experiencing fever over 100, difficulty breathing or cough?

#### ONSITE PROTOCOLS

- MANDATORY: Please arrive wearing your mask.
- Hand sanitizer will be available and all volunteers must sanitize their hands after signing in for their shift.

FOR SAN DIEGO

- When working, please be at least 6 feet apart from any other group. You may serve alongside your immediate family.
- Where larger groups will be serving together, we will be separating projects/tasks to keep separation.

Affiliates and the Hope for San Diego team will work to ensure all volunteers are practicing social distancing.
